I trust that, if any investigations come out of this little incident,.when I was sitting at my desk reading the Times..Naturally, the ordinary "somatic cells" of an adult human body, with their genetic equipment working only in highly specialized ways, cannot divide into a whole organism if left to themselves. Many body cells, such as those of the muscles or nerves, have become so specialized they can't divide at all. Only the sex cells, eggs and sperm, retain the lack of genetic specialization required to produce a new organism under the proper circumstances..Towards Here Is Coming An Evil Thing, RAY BRADBURY.I'd gone to a hospital, they'd have wanted to know how I'd stayed alive so far. Even her voice was changed?higher, firm, rapid..A faint orange glow outlined the top of a craggy boulder, and they hurried toward it over the crumbly ledge. When they climbed the rock, they saw that the light came from behind another wall of stone further away, and they scrambled toward it, pebbles and bits of ice rolling under their hands. Behind the wall they saw that the light was even stronger above another ridge, and they did their best to climb it without falling who-knows-how-many hundreds of feet to the foot of the mountain. At last they pulled themselves onto the ledge and leaned against the side, panting. Far ahead of them, orange flames flickered brightly and there was light on each face. For all the cold wind their faces were still shiny with the sweat of the.Unfortunately, launching twelve thousand torpedoes simultaneously put a serious overload on our computer system. Zorphwar runs at A-1 priority on our machine, which means that any other use of the machine is halted while Zorphwar computations are completed. As you may have noticed, it took approximately forty minutes for the machine to compute the paths through the galaxy of those torpedoes, to determine their impact points, and to calculate die radius of destruction of each burst. Normally such overloads are handled by adjusting the work load in the Computer Center. However, at three thirty yesterday, the Center was in the midst of printing the paychecks for the entire Computer Products Division. The little delay our game occasioned upset the very tight schedule for that

operation. As a result, all checks from R through Z were not printed on time and failed to make the courier flight to the West Coast That is the reason your paycheck was not delivered to you today. Regrettably, it is also the reason that Division President Tailing and Corporation Comptroller Westland were not paid this week. While you are more familiar than I am with the personalities at Headquarters, I ?aspect that both of these gentlemen like to receive their paychecks. I trust that, if any investigations come out of this little incident, you will do your best to emphasize the fact that the Zorphwar program has already been modified to permit the launching of no more than tea doomsday torpedoes in one attack. Someone immediately spilled the beans about Zorphwar. (I suspect it was J.L., covering his ass.) Friday afternoon Westland came slamming into my office to ask about a thousand questions about our schedules and the cost of running Zorphwar. I tried to get him to try using the program, but he was too upset to listen to reason. He gave me one hour to produce a full report justifying the project and went storming back up to the executive wing.
