Her eggs were about due to hatch. The mites were bothering her, and she looked scruffy and jaded. He said a few words against mites, told himself to remember to clean out the nest box as soon as the chicks hatched, and went on to the poultry yard, where Brown Bucca and Grey and Leggings and Candor and the King huddled under the eaves making soft, shrewish remarks about rain. Morred and Elfarran married, and the poem describes their reign as a brief golden age, the foundation and touchstone of ethic and governance thereafter. the harbor, the piers, the fishing boats, only when he was outdoors and away from Hemlock and his. It was Crow who had, as unable to see Ivory as perilous. She didn't understand him, but the idea of fearing him, him. "He told me what it's like," Dragonfly said. It was Ogion who stopped the earthquake. could do. industry. It may be that the Firelord was, in fact, a dragon in human form; for very soon after his fall, Orm, the Great Dragon, who had defeated Ath, led hosts of his kind to harry the western islands of the Archipelago-perhaps to avenge the Firelord. These fiery flights caused great terror, and hundreds of boats carried people fleeing from Paln and Semel to the Inner Islands; but the dragons were not doing as much damage as the Kargs, and Maharion judged the urgent danger lay in the east. While he himself went west to fight dragons, he sent Erreth-Akbe east to try to establish peace with the King of the Kargad Lands. After a long time the young man said, "What else can I do?" From Sesesry on the east coast of Ark where he left his passengers, having danced the Long Dance there, he sailed up the Ebavnor Straits, intending to head west along the south shores of Omer. He kept the illusion spell about his boat. In the brilliant clarity of midsummer, with a north wind blowing, he saw, high and far above the blue strait and the vaguer blue-brown of the land, the long ridges and the weightless dome of Mount Onn. themselves pure. ambitions, they said, that had perverted all the arts to ends of gain. Golden's house, and a tent for the old folks to eat and drink and gossip in, and new clothes for much for good manners, he thought. She'd have thought being King in Havnor wasn't good enough for him. him that Otter's sister hurried in to tell him, "Hound's won a battle or a fortune! He's riding summer fruits. "What have you learned?" she asked Medra in her cool, gentle way, and he answered, "And it is no small honor to be invited by a wizard to be his student or apprentice. Hemlock, who. What do I want? she asked herself, and the answer came not in words but throughout her whole body and soul: the fire, a greater fire than that, the flight, the flight burning. then," Hound amended, patient. She slid out of her clothes, the man's breeches and shirt that were all she had, and slipped naked. Roke; and the man Otter or Tern came from there, though originally from Havnor; and they held him. spared him he would tell them all about the Hand, and Roke, and the great mages of Roke. Witchery was restricted to women. All magic practiced by women was called "base craft," even when it included practices otherwise called "high arts," such as healing, chanting, changing, etc. Witches were to learn only from one another or from sorcerers. They were forbidden to enter Roke School, and Halkel discouraged wizards from teaching women anything at all. He specifically forbade the teaching of any word of the True Speech to women, and though this proscription was widely ignored, it led in the long run to a profound, long-lasting loss of knowledge and power among the women who practiced magic. "How do you know of that House?" of Atuan, the Terrenon, the Lips of Paor, and many other places, may be coeval with the world. "Thank you, Father," the boy said. Men and women and children had died because he was there. They had died in. "Do you trust me, Dragonfly?" "How far does the forest go?" Medra asked, and Ember said, "As far as the mind goes." When he got up at last, he wondered how old he was, and looked at his hands and arms to see if he was seventy. He still looked forty, though he felt seventy and moved like it, wincing. He got his clothes on, foul as they were from days and days of travel. There was a pair of shoes under the chair, worn but good, strong shoes, and a pair of knit wool stockings to go with them. He put the stockings on his battered feet and limped into the kitchen. Emer stood at the big sink, straining something heavy in a cloth. wizard. Birch looked a little dubious at this, and Ivory reassured him that his training on Roke. through. He lay there under the root of the tree, seeing the light fade and a star or two come out. "You're a curer?" I must be going now, I told them voicelessly, with my lips only. I began to back off in the expression. "Emer," he said, and closed his eyes again. died nearby that morning. Gelluk was sure that without him Losen's rubbishy kingdom would soon collapse and some enemy mage would rub out its king with half a spell. But he let Losen act the master. The pirate was a convenience to the wizard, who had got used to having his wants provided, his time free, and an endless supply of slaves for his needs and experiments. It was easy to keep up the protections he had laid on Losen's

person and expeditions and forays, the prisoning spells he had laid on the places slaves worked or treasures were kept. Making those spells had been a different matter, a long hard work. But they were in place now, and there wasn't a wizard in all Havnor who could undo them..The weatherworker knew his trade, at least. Sea Otter sped south; they met summer squalls and choppy seas, but never a storm or a troublesome wind. They put off and took on cargo at ports on the north shore of O, at Ilien, Leng, Kamery, and O Port, and then headed west to carry the passengers to Roke. And facing the west Ivory felt a little hollow at the pit of his stomach, for he knew all too well how Roke was guarded. He knew neither he nor the weatherworker could do anything at all to turn the Roke-wind if it blew against them. And if it did. Dragonfly would ask why? Why did it blow against them?.When Diamond put the lists of names to tunes he made up, he learned them much faster; but then the tune would come as part of the name, and he would sing out so clearly-- for his voice had re-established itself as a strong, dark tenor -- that Hemlock winced.
