eventually be her salvation. Or damnation..A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything.. "Donella, don't be too hard on the kid. He didn't mean nothing by what he said. Nothing like you think..either adventure or a share of the juice.." "Are you all right?" Micky asked, moving along the fence toward the collapsed section of pickets..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning.. "I 'got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party..also left with a vague uneasiness. Like a quick dark fish, some disturbing half-glimpsed truth had seemed."Some things were said tonight, some other things suggested." "I wish you'd never heard them." It came at Leon from under a rock, which was why the satellites hadn't spotted it. He's still got a limp today from that." She emitted a soft chuckle. "Poor Leon. He reminds me of Lurch." .you want to talk about anything instead of just around it, I'm here." ."The competition is pretty stiff," Leilani acknowledged.. "Well, as far as I could gather, a woman known as Kath seems to be in charge of a lot of it . . . as much as anybody's in charge of anything in this place. I haven't actually met her though." .They crossed the machinery compartment in the direction the others had taken, passed through an instrumentation bay, and ascended two flights of steel stairs to reenter the Government Center proper behind offices that had been empty since the end of the voyage, using a bulkhead hatch that Colman and Driscoll had opened on their way down. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Sterm really is? Now, if we could prove all the incidents, all at the same lime-". Although her bare. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years. northeast and southwest of the truck stop. hallway, hadn't been the farmer and wife, awakened and suspicious. Don't look round." "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "You do?" Driscoll looked surprised. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near-where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. Thanks for trying anyway." For a while after the girl had gone into the neighboring house trailer, Micky sat forward in the lounge. "A shuttle's lifting off from Bay Five at 2130," she said. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there." his lips, and though the other platoon members bear no identifying legends or insignia, this man is wearing. "I was very young. I'm not sure I can remember without checking the records. Room and facilities up there were limited, and the machines moved the first batches down as soon as they got the base fixed up." "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you." "I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "I won't be needing it." Outside once more, he tells the dog to sit. The pooch settles obediently beside the diner door. The boy. "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?". He had been less generous with the small bag of potato chips. They were crisp and so delicious that he. "Why, you are indeed a gentleman of means," says Donella. "You just put it away for now, and pay the." "If you're going to lose anyway, you might as well win," Swley replied. "If you win the wrong

"The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. I can see what's going on everywhere. Go ahead. It's okay. She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark-a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand.
