It was a small story on page three, not very exciting or newsworthy. Last night a man named Maurice. Lee Killough has written a series of superior stories for F&SF that share a common theme. "That's fine, but there is an even more important order of business. We have to go out to the dome and find out what the hell caused the blowout. The damn thing should not have blown; it's the first of its type to do so. And from the bottom. But it did blow, and wouldn't believe it. But it's more than just things that're different. People are different, think different?" "I mean quit everything: running, swimming, practicing. . .? Outside the nucleus is the cytoplasm of a cell, and it is the material in the cytoplasm that provides the various chemicals that help serve to inhibit or stimulate the action of the genes. An undercurrent of murmuring rippled quickly around the hall. Congreve nodded, indicating his anticipation of the 'objections he knew would come. He raised a hand for attention and gradually the noise abated. The North Wind was silent a whole minute. Then he asked, "Why should I? The wizard built my cave for me. What have you done to deserve such help?" The MacKinnons were not in their blue settee, and neither Freddy the usher nor Madge of the green sofa could say what had become of them. He flopped into the empty settee with a sense of complete, abject surrender, but so eternally does hope spring that inside of a quarter of an hour he had adjusted to the idea of never being licensed and was daydreaming instead of a life of majestic, mysterious silence on the rim of the Grand Canyon. On the side of the trunk that now sat in the corner was a small triangular door that Amos had not seen. The grey man pulled it open, tossed in the ruby, and slammed it quickly: Orghmftbfe. That afternoon I played gin with the Detweiler boy. He was genuinely glad to see me, like a friendly. But crazy in a dull, not an interesting way. He wondered how long they'd have to go on talking before the chairs switched round again. It seemed such a waste of time talking to another temp, since he could only get the endorsements he needed from people who held Permanent Licenses. Of course, the practice was probably good for him. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. (See, there goes Byline.) Actually, critics can make educated guesses from time to time about the tastes of some groups of readers. Editors must, such judgments being their bread and butter?and look how often they fail. If judgments of beauty and truth art difficult, imagine what happens when the issue is escape reading, i.e., something as idiosyncratic as guided daydreams. Perhaps the popularity of series novels is due in part to readers* desire for a reliable, easily reproducible pleasure.
