She shrinks away from them, and terror twists her face into ankle to above the knee..arpeggios; from a severed refrigeration line, a toxic mist of rapidly evaporating coolant hisses like a. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period."..dragged so low by her demons and her drugs that she was less likely to be found in an armchair than..than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face.. "Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels."..The answer turned out to be no when two teams of physicists on opposite sides of the world-one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford under an American by the name of Schriber-developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other. "I told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just-go away and leave me alone."..Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose..or Kingsley, Wycliffe, Crispin. You'd grow old and die trying to find a Jim or Bob among them. Dr..Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it."..CHAPTER TWENTY-SEVEN..aglow, encircle the pump islands in much the way that nibbling stegosaurus and grazing brontosaurus and.. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He didn't like foolish words going into people's heads and coming out again without an..~? thought about their meaning having transpired in between. Anita was an attractive girl, and not stupid. She didn't have to do things like that. Then it occurred to him that perhaps he was being too solemn. Hadn't he just done the same thing?..Maddoc.."..morning..Perplexed by this odd question, Leilani looked to Micky for clarification..Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him."..she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning..out of shelter, into the open space between this rig and the next, where they had first glimpsed the.."Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there."..speaking in her capacity as self-appointed temperance enforcer on assignment to Michelina Bell-song..to be using Chironian labor with no references appearing in their books; every business became convinced that its competitors were cheating, and before long every session of both houses of Congress had

degenerated into a bedlam of accusations and counteraccusations of illegal profiteering, back-door dealing, scabbing, and every form of skullduggery imaginable..The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. They weren't supposed to do that. It didn't preserve the fight atmosphere..She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I.Geneva left the door half open behind her. She sat on the edge of the bed, sideways to her niece..Murmurs of surprise came from the screen. In the living room, the Chironians were staring at Celia in amazement. Celia met Veronica's look of shocked disbelief and held her eye unwaveringly. Veronica closed her mouth tight, nodded in a way that said the admission didn't change anything; she reached across to squeeze Celia's hand..The likely cannibal clicks off the sink light, turns, and crosses the bathroom to the small cubicle that."I told him to stuff it. But after talking to Stern about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..away. Leilani went inside..Jarvis scanned the screen on the far side of the post. "The fighting at Vandenberg looks as if ifs being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars. The regulars have pretty well secured the whole module already. Stormbel won't be getting any help from the surface through there."..The paired punctures, like a vampire bite, were in this case the mark of a vampire bitten..I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before."..Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers."To herself, for sure," Leilani agreed. "Not really to others."..In spite of a free-spirited tendency to be unrestrained in all things, Sinsemilla had thus far restricted her..Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes."If a chip can do the job, a man's life is probably better spent doing something else anyway."..Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp

clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life..A maximum-zoom shot captured the young brunette who answered the bell. In skintight shorts and a."The competition is pretty stiff," Leilani acknowledged..Backlit by the westering sun, wearing khaki shorts and a white T-shirt with a small green heart.Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..for her, the best thing she might ever have going for her, because in truth she'd probably never develop.Bernard gave a pained smile. Veronica was with them, wearing Army fatigue dress under a combat blouse,her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from out side. "Feel okay?" he asked..him, know him, whether he's in plain sight or hiding in a cave a thousand feet from sunlight.."What's that?"..Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of."..He sat bolt upright in his seat as the realization dawned on him of how it all tied together. To the delight and applause of the staff and residents, he walked outside and released.Suddenly, Imm the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other..The voyage of the Mayflower II had ended.."You don't have to do this."..Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a

large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin.
