Dragonfly looked about at the sights of the city in a silence that might have been awe or disapproval or mere stolidity. "This is a nice little town," Ivory said, "but the only city in the world is Havnor."..Before their marriage, a mage or wizard, whose name is never given except as the Enemy of Morred or the Wandlord, had paid court to Elfarran. The children were squatting on their haunches, heads close together, laughing. Something intense or uncanny about them made him pause at the window on the stairs landing and watch them. A thing between them was leaping up and down, a frog? a toad? a big cricket? He went out into the garden and came up near them, moving so quietly, though he was a big man, that they in their absorption did not hear him. The thing that was hopping up and down on the grass between their bare toes was a rock. When Diamond raised his hand the rock jumped up in the air, and when he shook his hand a little the rock hovered in the air, and when he flipped his fingers downward it fell to earth..to the fire," and had him sit down in Bren's settle close to the hearth. Then a fish leapt from the black, shaking water, a white-grey fish the length of his hand, and as it leapt it cried out in a small, clear voice, in that same language, "Yaved!".Diamond hesitated and said, "No." He looked a question at his father..Ivory looked at that hill with a kind of longing hatred.. He lay there under the root of the tree, seeing the light fade and a star or two come out among the leaves.. "He told me what it's like," Dragonfly said. "You walk up through the town, Thwil Town. There's an old pallet in the woodhouse. Air it. Don't bring mice in with it." And he stalked off towards the Overfell, angry with the boy for coming and with himself for giving in; but it was not anger that made his heart pound. Striding along-he could stride, then-with the seawind pushing at him always from the left and the early sunlight on the sea out past the vast shadow of the mountain, he thought of the Mages of Roke, the masters of the art magic, the professors of mystery and power. "He was too much for 'em, was he? And he'll be too much for me," he thought, and smiled. He was a peaceful man, but he did not mind a bit of danger..The original loose, roughly descriptive use of the words witch, sorcerer, wizard, was codified into a strict hierarchy by Halkel. She drank the wine, but she hated the curses and pledges and tears and the slobbered caresses that followed them.
