Speaking his heart seems the best way to make amends. "You're so fabulous, so beautiful, so so incorruptible, they'd rather have their teeth kicked out than betray a client." After Swley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." Sure enough, Swley explained, "They don't make bombs or organize armies. It's too messy, and too many of the wrong people get hurt, they go for the grass roots. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." "I just said that people telling them wouldn't bother them." Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Stern. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. Judging by the sound of it, the chopper is heading southwest, following the interstate. This is not good.. "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." thee with a work of art fair suitable for the galleries of Eden." "You can say that again," Bernard agreed.. life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left\* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Farnhill looked uneasy and seemed a trifle awkward. "Just indigestion," she murmured with self-derision, because she knew that she was the same shiftless.. the deeper regions of your mind. Until now, she hadn't been aware that she herself provided a nest for. And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston. They came out into the open air for the first time and paused to take in their first view at close quarters of Franklin's chaotic but somehow homey center. "And what about all this?" Eve asked. "Does it go back to the first days too?" The first door opens on a bathroom. The second lends to a bedroom; hooding the flashlight to dim and. Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." "Therefore? Micky." Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigimi-tama; and one violent, aramitama-and, accordingly, Okasotaka christened his two speces of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee.. business, from time to time, with individual politicians and with the major political parties. Haven't the scientists on the ship done the same?" "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." "Good pup." "I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I." Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual stuff." The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?' He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family." CHAPTER TWENTY-SIX.years ago. A wickedly messed-up kid. "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." Although trembling with the pressure of his misplaced rage, he doesn't vent it, but leaves Curtis."He has a certain style. She blotted them again. In spite of the August heat, her hands were cold.."Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half.were to can her and talk to her nicely." Jarvis and Chazure glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring." Fulmire gestured over the books and documents spread across his desk. "The security provisions provide for Congress to vote exceptional powers to the Directorate in the event of demonstrable security demands, and for the Directorate to delegate extraordinary duties to the chief executive once they are voted that power. They do not provide for the chief executive to assume such duties for himself, and therefore neither can he do so for his successor." The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--fight down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out.."Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this." She turned on the shower, as well, but she didn't undress. Instead, she lowered the lid on the toilet and.beaten and left for dead. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to.Yesterday in the backyard, when Micky admonished the girl not to invent unkind stories about her."How is Kalens's wife?" His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--"."Boy, I've never seen a place like this."
