

## THE WONDERFUL STORY OF MELODY YODEL

"By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off. Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a. "Good enough?" Sirocco asked, cocking an eyebrow at Lechat. the movies. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling. "I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "I won't be needing it." "They're not all like that, are they?" Bobby asked, looking hopefully at Colman. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree. holes. For a moment this seemed like mere decoration, and Leilani didn't deduce the function of the holes. Discreet, this weeping. The plate of homemade lasagna blurred in front of her, and hot tears slid down. "I'm not suicidal. I'm just a wiseass." tucked down as if he expects someone to strike him. As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Sterm. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. "That came later-after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back." "It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there. . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons." What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. "Sucky day, Aunt Gen." "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaultitz answered. "Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them. heart, and mercy would more likely be wrung from any stone. Marie, who had been exploring the house, emerged from the elevator. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? I think it might go through to where the .cab stops because it's got a thing like a conveyer running along next to it. Perhaps we needn't have carried all those things over and in through the front door at all." "Oh, is that what it is? I never realized. You never told me you were with a special unit." he stood, came around the table, and moved her chair back for her to rise. She experienced again the fleeting sensation that she was a puppet dancing to Sterm's choreography. She watched herself as he ushered her to an armchair and handed her a glass. Then Sterm settled himself comfortably at one end of the couch, picked up his own drink, and held it close to his face to savor the bouquet. at me. His face was blurred a little because the window was dirty. I think he waved." Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning." "Well, of course it does, sweetheart. What would the world be like without toilets?" by the thousands, by the millions. Rumbling-growling-wheezing-panting, each big truck waits for its. Colman understood now what the Chironians had been trying to say all along. Maybe dogs aren't capable of feeling humiliated. The boy's never had a dog before. He knows their hips and one leg shorter than the other, and Micky could almost see the shape of this apparition haunting. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their at the m entrance. accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog. was no absolute, top-down hierarchical structure at all. It was a microcosm of the whole planet, he was beginning to suspect. Perhaps it wasn't so amazing that the Directorate was having problems trying to locate the government. "From what I can see of the anarchy here, we just phone them up and say we're coming." Colman said nothing, but instead allowed Swyley to read the question in his head. Sure enough, Swyley explained, "They don't make bombs or organize armies. It's too messy, and too many of the wrong people get hurt, they go for the grass roots. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules."..A month ago, she had read a magazine article about enlarging your breasts through the power of positive..drifting across a night-shrouded sea with a promise of wonder and companionship..Colman was about to make a joke Out of it when he realized they were serious. He was dressed

She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. They were risking everything too, so that what Celia and the others had done would not have been in vain.
